5/4/21 LCD A team Meeting
Attendees: Mary, Sean, Erin, Phil, Matt, Natalie

Social/Cultural/Economic Sub-Team
- Brooke Kapeller (bkapeller@cpaws.org)
- Kelly Cooley (coolprosolutions@gmail.com)
- Connie Simmons (connie@y2y.net)
- Mary Riddle (mary_riddle@nps.gov)
- Amber Zary (amber.zary@gov.ab.ca)
- Nanette nelson (nanette.nelson@flbs.umt.edu)
- Patsy McEntee
- Mary McClelland (marytreemcclelland@gmail.com)
- Put the breaks on convening this group until we have Tribal participation
    - Parameters on how we engage Elliot - what we would ask him to do specifically
        - How do we balance engagement across Tribes and First Nations to be inclusive of all Tribes and First Nations
        - Maybe we could seek to work with the Crown Roundtable
        - Sean and Erin will determine talking points and a specific ask when they meet tomorrow
- How do we get more engagement from the CMP SC
    - Want people on the SC to be ambassadors of the design when speaking with folks from their agencies
    - Sean drafted overall talking points - why is this important to you as a citizen in the Crown - in a certain discipline
        - Make central to the CMP Spring Steering Committee meeting

Subject Matter Experts
- Ideas on how to facilitate these conversations:
    - Will have to balance lack of understanding with having people contribute
        - Cherrypick high level things that resonate with everyone, but don't get bogged down with LCD jargon
    - Immediately engage people rather than present at them
        - Survey - what are the 3 most important obstacles/threats to species
        - Let people respond to these questions in their own way rather than showing them what we have determined - a good check point for us
    - Send out a survey ahead of a meeting
    - Test drive with subject matter experts that we do know

Evaluate Elk & Mule Deer data (Phil)
- Elk
    - Data Sources
        - Winter Range Data
        - Mineral Licks
        - Distribution data

- - - ■ GPS data
  - ○ Process:
    - ■ Clipping the data - this is not needed because Marxan does this; best to not clip
    - ■ For Elk said all of Montana would be adequate (score of 5,000) in order to fill in data gap on Flathead Nation and Blackfeet Nation
      - ● Maybe pull out Flathead Lake
- ● Mule Deer
  - ○ Summer range from CCE old data sets
  - ○ General use and General wintering habitat
  - ○ Winter range
  - ○ GPS
  - ○ Mineral Licks
- ● Sean will send along Harvey Locke's Human Modification Index
